Ms. Marlene H. Dortch, Secretary
Federal Communications Commission
445 12th Street, S.W.
Washington, D.C. 20554

RE: WT Docket No. 02-55

Dear Ms. Dortch:

I write to call your attention to an important issue that significantly affects Connecticut and our nation regarding the issue of public safety radio interference. Public safety agencies utilize dedicated channels on the 800 MHz spectrum. Commercial wireless operations are located on adjacent bands. The incompatibility of these two different functions and the significant problems that occur due to interference needs immediate resolution. Public safety communications, especially in these times, cannot be compromised or be subject to interference.

I speak with some experience in this matter. I chaired the Emergency Operations Command in New Britain when it changed its public safety communication system to an 800 MHz-trunked system. New Britain was the first public safety operation to do so in Connecticut, long before other public safety agencies did so. I also serve as Chairman of the Connecticut Department of Public Safety's Citizens Advisory Committee and as a member of the Connecticut Commission on Police Department Accreditation. In all these bodies, the integrity and operation of public safety communications is a matter of continual review and discussion.

The Federal Communication Commission has a plan currently under consideration that addresses the current quagmire of 800 MHz systems licensing. The *Consensus Plan* will virtually eliminate the interference, provide additional bandwidth spectrum for public safety providers and offer a platform for future development.

I urge your support of the *Consensus Plan* solution that is so important to solving a vexing and dangerous problem in public safety communications.

Sincerely,

Richard L. Judd
President

Chairman, CT Department of Public Safety
Citizens Advisory Board
